

FREE REMOTE INSTALL · NO SALES PITCH · FIXED PRICES, PUBLISHED OVERLEAF

Your 24/7 office manager assistant. Works with Open Dental.

Dental Cristal watches your live Open Dental data around the clock — catching the billing errors, stalled lab cases, unverified insurance, and reconciliation gaps that cost real practices real money. Errors are easy to correct but hard to find. We find them.

Money leaking through the cracks

Unbilled production, unposted payments, reconciliation gaps between Open Dental, your processors, and the bank.

Staff drowning, mistakes piling up

Your team juggles phones, insurance, patients, and claims all day. The office manager re-checks everything by hand and still falls behind.

No true picture of the business

Gut feeling and month-old reports. A report is a snapshot — the second someone edits the database, it's wrong.

HOW IT WORKS

Three steps. No pitch, ever.

- 1 Book a free 30-minute discovery and demo call.**
A video call. We learn about your practice and show you a live demo of what the system watches; you get a short checklist of what we'll need to install. No commitment.
- 2 Free remote install, done for you.**
Three 1-hour remote sessions: install, team training, and Q&A with a live demo of your own data. You don't touch a thing.
- 3 The system watches; you get the report.**
It monitors your live data continuously. You get a plain-English "what we found" summary in the app — the errors, the dollar amounts, the fixes. The product does the selling from here.

**Book your free 30-minute consultation**

Scan the code or visit dentalcristal.com/book. Thirty minutes, video call, no pitch — including a live demo.

WHAT IT WATCHES

A list that replaces memory.

Every role gets a live, always-current error list — not a report you pull, a list that never goes stale. A sample:

Claims — never created · parked on a note · stalled, partially paid, or denied

Insurance — verifications invalidated by later bookings · high-risk codes flagged before the visit

Compliance — unsigned treatment plans and consents · provider notes never written

Lab cases — never submitted · not received on time · not attached to the appointment · crown seatings with no crown on record

Money — copays calculated but never collected · every penny traced from Open Dental through processors to the bank

Patients — recall with real reasons and outcomes · ghost appointments · missed follow-ups

PRICING

Every price is on this page.

That's the whole pricing strategy.

Software license

\$0

forever

Licensed per office. The core system on your Open Dental data — out-of-the-box functions, install and use.

Setup & Training

Free

initial 3 hours

Installation on your server, team training, a follow-up check-in.

Operations Partner

\$750

per month · annual prepay: 10 months for 12

Ongoing operational support, regular summaries of your office operations with recommendations.

Practice consulting with customized solution development

Free

diagnosis and quote

Phone and text integration, AI-driven features, custom functions for your clinic's specific problems, etc.

Fixed prices. No discounts. No negotiations. Custom projects get a free diagnosis and one fixed quote. The free software license and install are the discount — there's nothing left to discount. Software is included, never sold separately.

WHY IT IS DIFFERENT

- **Proactive, not retrospective.** Business-intelligence tools show you last month's numbers. We catch today's errors before they become last month's losses.
- **Continuous, not periodic.** Static checks are obsolete the moment someone edits the database. We monitor the live database all day.
- **Safe by architecture.** Read-only access to your Open Dental database; it never modifies it directly. Anything written goes through Open Dental's official API.
- **AI you can trust.** AI features can run on a locally-hosted model, so patient data never leaves your office.

Know an office that's leaking money?

If you're a Dental Cristal office, tell a colleague to mention your practice name when they book. When they've paid us \$500, we send you a \$500 thank-you. No forms, no codes, no fine print — and never a payout before we've been paid ourselves.

Find out what your practice is missing. Free.
